

Al galore!

Every week there's something new coming from Cortex – and this week, we'll be using the new `ENTITY_SENTIMENT()` function.

Professor Frosty's training programme has been going from strength to strength thanks to these WONDERFUL reviews!

```
create or replace stage frosty_stage
  url = 's3://frostyfridaychallenges/'
;

create or replace table week_139 as
select
  $1 as id,
  $2 as student,
  $3 as rating,
  $4 as review_text
from
  @frosty_stage/challenge_139 (
    file_format=>'frosty_csv'
  )
;
```

Now, it is your job to figure out the sentiment for the following categories:

- Overall
- Content
- Teaching

And the result ought to look something like:

	ID	STUDENT	RATING	REVIEW_TEXT	SENTIMENTS	SENTIMENTS
1	1	Jenna B.	4	Professor Frosty's Snowflake bootcamp is equal parts dazzi	{ "categories": [{ "name": "overall", "sentime	{
2	2	Liam K.	2	If you enjoy learning amid pandemonium, this is your jam. Pr	{ "categories": [{ "name": "overall", "sentime	"categories": [
3	3	Priya S.	5	Best. Training. Ever. Imagine Willy Wonka rebooted as a dat	{ "categories": [{ "name": "overall", "sentime	{
4	4	Eduardo M.	3	The course oscillates between genius and farce. Professor f	{ "categories": [{ "name": "overall", "sentime	"name": "overall",
5	5	Candace L.	1	I signed up for professional upskilling, not a circus on ice. Pr	{ "categories": [{ "name": "overall", "sentime	"sentiment": "positive"
